EDUCATION

Mehran University of Engineering and Technology Bachelor of Science in Artificial Intelligence (BSAI); CGPA: 3.58	Jamshoro, Sindh July 2023 - Aug 2027
Computer Man Institute of Emerging Technologies Diploma in Information Technology (DIT); Grade: A	Hyderabad, Sindh Oct 2021 - August 2022

SKILLS SUMMARY

Languages: JavaScript, Python, Java, Typescript
Frameworks: Next.js, MERN, ShadCN, Pandas, Scikit-learn, TensorFlow, React Native (Expo), Supabase, Convex

WORK EXPERIENCE

Web Development Intern – MUET FM	MUET FM 92.6
Developed and deployed a full-stack website for MUET FM. Handled both frontend and backend – from UI design to database integration and user authentication. Optimized performance and ensured smooth deployment with live testing and real-time updates.	

PROJECTS

Health Mate	Live Demo	GitHub
Built an AI-powered medical report analyzer during SMIT Coding Night Hackathon using Next.js (App Router) and TypeScript. Integrated Google Gemini 2.5 Flash to analyze medical reports (PDFs, X-rays, prescriptions) and generate bilingual summaries (English + Roman Urdu) Implemented secure authentication with Clerk and managed user data using Supabase. Developed a modern glassmorphism UI with Tailwind CSS and shadcn/UI, supporting dark mode and mobile responsiveness		
ExoQuark (NASA Space Apps Challenge – Hyderabad Winner)	Live Demo	GitHub
Developed a production-grade exoplanet classification platform for NASA Space Apps Challenge 2025 (Hyderabad, Pakistan). Built using Next.js, TypeScript, and Three.js, integrating AWS Bedrock (Claude 3.5) for natural language explanations of exoplanet predictions Implemented mission-aware ML models (XGBoost / LightGBM) trained on NASA’s Kepler, K2, and TESS datasets to classify exoplanet candidates. Designed a 3D visualization interface with React Three Fiber to explore planetary systems and mission data interactively Connected a Flask ML backend hosted on Render with Next.js API routes for real-time predictions and explanations Integrated a full data pipeline with preprocessing, model serialization, and scalable API endpoints for instant inference		

Achievements

Winner – Hacktoberfest by AWS MUET (2024) and Runner-up (2025)	HactoberestLinkedIn
Developed a cross-platform mobile app using Expo React Native	
Winner – NASA Space Apps Challenge Hyderabad (2025)	NasaSpaceLinkedIn
Built a web-based solution using Next.js, Three.js, ML, and Flask; nominated for Global Round 2025.
